

The optional card reader module facilitates the use of RFID cards for 2N<sup>®</sup> Helios IP lock and switch control. Connect the module to any 2N<sup>®</sup> Helios IP version and configure the system easily using the web interface.

Moreover, the module contains two additional switches and universal digital inputs and outputs for user applications (open door control, light activation).

2N<sup>®</sup> Helios IP with an additional card reader module can be used as a stand-alone system or integrated in your existing security system equipped with a Wiegand or RS-485 interface.

## Features:

- RFID technology 125kHz - EM4100/4102
- 2 additional switches
- Digital inputs and outputs
- Wiegand/RS-485 interface
- Web configuration
- Time profiles for cards

## Benefits:

- Simple solution for comfortable and secure entry
- Higher security level
- Up to 4 switches
- Entrance monitoring
- All functions in one system
- Integration with security systems

## Target groups:

- Offices and office buildings
- Residential areas, apartment buildings, suburban settlements
- Parking places
- Detention centres
- Schools
- ... any facilities where a secure and simple door control is needed
