

Quadro[®] 6L

Quadro6L: The IP PBX with 6 FXO Ports

Epygi designed the Quadro 6L for environments that require multiple ringing phones and shared trunk appearance visibility. It economically delivers a wealth of PBX features like voice mail, auto attendant, on-hold music or messaging, caller ID with distinctive ringing, call pickup, paging and intercom while providing key-system features in the default setup.

The Quadro 6L provides for as many as ten local IP extensions via the LAN connection. Users choose from a variety of Aastra IP telephone sets* with buttons that can be programmed for incoming phone lines and additional features. The Quadro 6L includes six separate FXO ports for PSTN lines, plus a WAN port for optional Internet calls.

*Aastra 55i, 57i, 9133, and 480i models as of February, 2008

Legacy Phone System Replacement

Epygi designed the Quadro 6L for deployment right out of the box as a turnkey solution. Using advanced plug-and-play IP phones and multiple FXO ports for PSTN access, this IP PBX functions as a key-system by default. As a bonus, Epygi delivers features not found on traditional key systems. Business enhancements include after-hours auto attendant and unified messaging among many others.

Effortless Administration

Sophisticated auto-recognition and auto-configuration capabilities between the Quadro 6L and Aastra phones simplify installation and operation. The administrator can modify automatic assignments through the graphical user interface.
