**FOR IMMEDIATE RELEASE**

---

## **EnterprisePlus™ Line Interactive Sine Wave UPS Systems Introduced**

---

**Rackmount line interactive UPS available in 750VA – to 3000VA  
Both 120V and 208V models available**

Carrollton, Texas – September 27, 2007 - The Minuteman EnterprisePlus™ Series UPS is an exciting new UPS line that provides users all the features, usually available in higher-priced UPS products, to protect valuable equipment, offering voltage regulation, spike and surge protection and battery backup.

Ideal for small and medium sized business, voice over IP (VoIP), telephone switches as well as enterprise networks and servers, the EnterprisePlus™ Line Interactive UPS systems expands and improves on the foundation of the earlier Enterprise UPS product line.

The EnterprisePlus Line Interactive UPS series has five 120VAC models and two 208VAC models:

1. E750RM2U UPS rated at 750VA/600W – 120VAC – 6 UPS outlets
2. E1000RM2U UPS rated at 1000VA/800W - 120VAC– 6 UPS outlets
3. E1500RM2U UPS rated at 1500VA/1200W – both 120VAC and 208VAC– 6 UPS outlets
4. E2000RM2U UPS rated at 2000VA/1760W - 120VAC– 7 UPS outlets
5. E3000RM2U UPS rated at 3000VA/2560W - both 120VAC and 208VAC– 7 UPS outlets

The Minuteman® EnterprisePlus™ line interactive uninterruptible power supply (UPS) combines line interactive technology with industry-leading features in a versatile case design that allows the units to be installed in many different formats and environments. It occupies only 2U of space in a traditional 17-inch rack. In developing one of the best-valued, highest quality UPS products on the market, the EnterprisePlus UPS has these standard features:

- **0.8 power factor** - increases the capacity of the unit without migrating to larger models (0.88 power factor for 2000VA and 0.853 power factor for 3000VA).
- **Load shedding** - extends the time of critical applications without adding external battery packs by removing power to non-essential devices connected to the same UPS through the network connections.
- **Independent battery bypass™** - allows the UPS to provide voltage regulation with surge and spike protection on the utility AC power even when batteries are weak or dead.
- **Independent battery pack chargers** - reduces battery recharge times.
- **Virtually unlimited extended runtime for critical applications** - virtually an unlimited number of battery packs can be connected to the EnterprisePlus UPS for extending run times.
- **Flexibility in installation** - floor-standing tower and 19-inch rackmount hardware is included. Optional installation kits are available for 23-inch rack/cabinet and wallmount installation.
- **Small form factor** - 3.5-inch (2U) rack/tower case style.
- **Simultaneous DB-9, USB and SNMP communications.**
- **Minuteman® SentryPlus™ UPS monitoring and control software** included with each UPS.
- **Easy to read front panel display** - with load/battery meter
- **Industry three-year warranty** - is non-prorated and includes warranty on both the UPS and the batteries
- **Dedicated remote Emergency Power Off (EPO) port**
- **120V and 208V models available.**
- **RoHS compliant** - - compliant with the European Union's directive on the reduction of hazardous substances (RoHS) in electronic equipment.
- **Protects your investment** - connected equipment is covered with \$100,000 Minuteman Platinum Protection Plan® (U.S. and Canada only)

The EnterprisePlus Line Interactive UPS systems will be shown at three trade shows in September:

- September 10-13, 2007 - 2007 BICSI Fall Conference at the Las Vegas MGM Grand. Para Systems/Minuteman UPS will be in booth 504.
- September 11-12, 2007 - ISC East 2007 at the Javits Convention Center in New York City. Para Systems/Minuteman UPS will be in booth Booth 1659.
- September 24-27 2007 – ASIS 2007 at the Las Vegas Convention Center. Para Systems/Minuteman UPS will be in booth 695.

Initial shipments of the EnterprisePlus Line Interactive UPS products have already started to customers and are priced to sell to end users in the \$400 to \$1,200 range. Battery packs are available from \$389 to \$500.

For over 25 years, Para Systems/Minuteman UPS has provided quality power products with excellent personalized service and direct human response to all service and support calls. Minuteman products pass extensive quality control testing before being shipped to customers.

## Background

Para Systems, Inc. is a leading provider of power technologies including the Minuteman® Uninterruptible Power Supplies (UPS) for mission-critical equipment protection such as computers, telecommunications systems, security systems and Internet devices. Minuteman® UPS products range from 400VA standby units to true sine wave, line interactive, and on-line models rated up to 10kVA.

Para Systems provides SentryPlus™ remote power and network management controller software for all popular operating systems including Microsoft® Windows®, Novell, Unix, and Linux. Para Systems also sells power distribution units (PDU), power management software, keyboard-video-mouse (KVM) systems and surge suppressors.

Additional corporate and product information is available at the Company's website [www.minutemanups.com](http://www.minutemanups.com). A free UPS sizing and selection tool is available at [www.sizemyups.com](http://www.sizemyups.com) that can determine which Minuteman® UPS units can best meet your application's power protection needs. The website

*www.sizemypdu.com* can determine which PDU is the appropriate product and *www.comparemyups.com* can compare UPS features to competitive products.

**Minuteman® UPS and Minuteman Platinum Protection Plan are registered trademarks and EnterprisePlus and SentryPlus are trademarks of Para Systems, Inc. Other trademarks are registered by their respective companies.**
