

DiscusTM Dual Mode **Phone** DP-L10

Pirelli's Dual Mode Phone unites - Dual Mode Handset (Wi-Fi/GSM) Wi-Fi and VoIP technology in one handset. Now you can deliver the convenience of a mobile and a broadband cordless in ONE phone.

- GSM tri-band (900/1800/1900MHz)
- Wi-Fi 802.11b/q
- SMS, MMS, WAP, E-mail
- Over the Air Provisioning (OTAP)

The Pirelli Discus™ DP-L10 is a dual-mode GSM/SIP Wi-Fi handset, combining tri-band capabilities with the support of SIP VoIP via an integrated WLAN 802.11g interface.

The DP-L10 works like a standard cell phone - any GSM SIM card will work- and cell features such as MMS, e-mail and WAP browsing both over a cellular and a WLAN interface. When at home or in office the DP-L10's Wi-Fi capability allows yourcustomer to enjoy services and applications at a higherspeed and lower cost.

While developed on industrystandards to maximize interoperability with network and access equipment, the DP-L10 features enhanced QoS and battery duration capabilities thanks to firmware and software features developed by Pirelli.

> The DP-L10's Wi-Fi and VoIP parameters are fully provisionable remotely via OTAP, thus ensuring a zero touch configuration experience for users.

The DP-L10 is designed and qualified to operate in a multi-vendor, standardsbased environment. Moreover, the DP-L10 can seamlessly integrate within Pirelli's technology bundle for quadruple play services, which comprises:

- Pirelli's Multiplay Access Gateways, serving as multiservice routers with advanced MIMO WLAN capabilities specifically enhanced for VoIP and video-streaming applications over WiFi.
- Pirelli's AWR WLAN extender, a self-configuring Wi-Fi repeater supporting extended indoor coverage and seamless WLAN roaming.
- Pirelli's DuMan Management System, an application allowing Over The Air (OTA) remote provisioning and firmware upgrade to streamline service delivery and customer support tasks for VoWLAN services based on dual mode handsets.
