SIP PRINT
Pure SIP Recording™

True SIP-Compliant Call Recording
Easy to Install, Easy to Operate, Easy to Afford

As organizations move rapidly to embrace the cost savings and flexibility of VoIP-based communications systems, small and medium size businesses have lacked access to affordable system-level SIP call recording capabilities despite their growing need to record phone conversations. Available systems were limited to exorbitantly expensive and complex enterprise solutions or simple PC-based handset recording software and software logger patches.

Until now...

SIP Print introduces an affordable IP-based network appliance that offers pure system-level SIP voice recording for Small and Medium Businesses with 15-200 seats per location. And because it supports SIP at the communications system level, SIP Print's patent-pending platform can also record advanced functions like voicemail or "follow-me" calls forwarded to mobile phones or off-premise phone numbers.

CALL RECORDING FOR:

CALL CENTERS

FINANCIAL SERVICES

LEGAL SERVICES

EMERGENCY SERVICES
