MxActivitySensor New Motion Detection Sensor

NEW

The MxActivitySensor is an activity-controlled, software-based image analysis function for detecting movement of people and objects in a monitored area (full image or section). Unlike existing video motion sensors, which detect all events in the defined motion windows, the MxActivitySensor is very easy to configure and delivers reliable results, even in applications with large amounts of external interference.

What is it all about?

Profit from one of the best MOBOTIX success stories. In order to support the growth of your MOBOTIX business in this most productive season, we are introducing a **Buy 5 - Get 6** offer on all **M12 DualNight Secure** models: Six premium cameras for the price of five! Your extra benefit: Each M12 promotion camera comes with the pre-installed brand new **MxActivitySensor**.

How does it work?

For every five M12 DualNight (SEC models), you receive one additional M12 DualNight camera of your choice, free-of-charge (except LPF models).

Who is this offer available to?

This offer is aimed at all MOBOTIX partners.

How can I order?

Order directly from your local distributor via e-mail, fax or mail using the order form provided on the back.

How long is this offer valid for?

The offer is available **until 27th of June 2013** (while stocks last; the M12 will soon be followed by the new M15 AllroundDual camera including the MxActivitySensor).
