

Agenda

10.30 am Registration & Coffee

11.00 am Welcome

How to leverage innovations in IP video surveillance and gain a competitive advantage with MOBOTIX.

11.15 am Live Demonstration 1 - Commercial Security Solutions

- Experience the ease of use of the brand-new **software platform MxMultiViewer** that is touchscreen-compatible for fast interactive video wall response. You will see how to configure a network of cameras and door intercoms within minutes.
 - Discover exciting features of the newly designed **hemispheric cameras i25, c25** and experience the outstanding light sensitivity of the brand-new **6MP color sensor with Moonlight Technology**.
 - Learn how **M15D-Thermal cameras** and **MxActivitySensor** open up new fields of applications and new opportunities in particular with remote sites and critical infrastructure.
-

12.15 pm Live Demonstration 2 - Residential Security Solutions

- Discover the new wall-mounted **MxDisplay**, which serves as a video remote station for the **T25 door station** and controls the cameras of a residential video security system. You will experience how to oversee several cameras, retrieve video messages or create a new access transponder card for a visitor with a few swipes directly via the touchscreen of **MxDisplay**.
 - Learn how to set up a home security solution with just four devices: **MxDisplay**, the **T25 door station** and two discreet **S15D FlexMount** cameras and why an increasing number of residential homes are equipped with a thermal camera.
-

12.45 pm Summary

1.00 pm Lunch and Networking

1.30 pm onwards Ask the MOBOTIX Expert

Discuss technical solutions for your projects directly with MOBOTIX experts.
