

CyberData Background

- In business for 33 years
- Supplier to OEM's and large end users
- Vertically integrated product development
- In-house manufacturing
- Can manufacture prototype or large scale quantities
- Specialize in quick-turn, low cost connectivity solutions
- Develops Peripheral Devices for VoIP Phone Systems

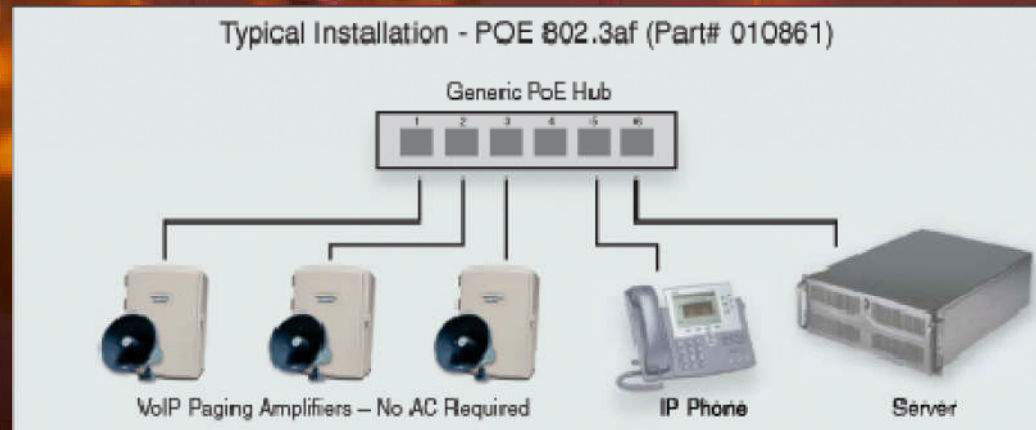

VoIP Ceiling/Wall Speakers

- IP-based Public Address Speaker
- Power over Ethernet (PoE)
- HTTP – Web Based Configuration
- SIP Endpoint or Multicast Option
- High Efficiency Speaker
- 8+ Watts Total Power (>105dB / 1M)

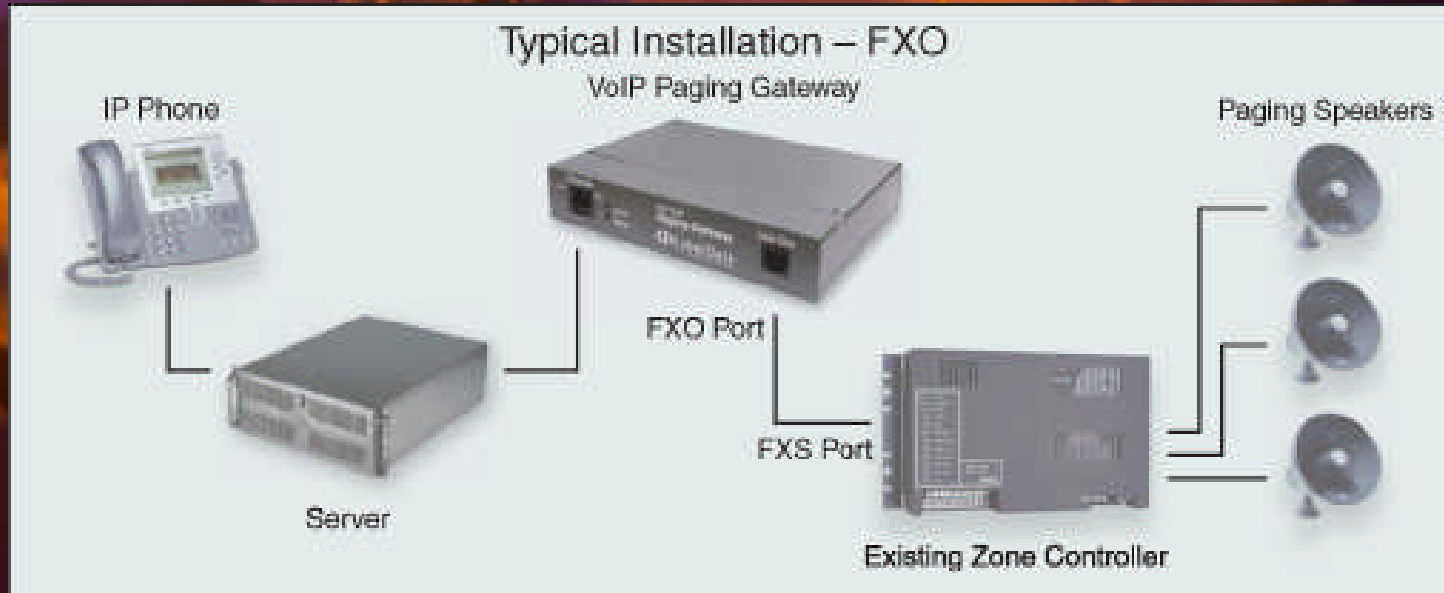

VoIP Loudspeaker Amplifier

- VoIP Paging for Noisy Environments
- SIP Endpoint or Multicast Option
- Moisture-resistant NEMA Enclosure
- Wi-Fi 802.11 Option
- PoE Enabled – 802.3af

VoIP Gateway

- Enables Analog Paging with VoIP Phone System
- FXO Output to FXS Input on Zone Controller
- SIP Endpoint on Network

VoIP Zone Controller 4 port Audio-out

- VoIP Zone Paging with Audio-out Interface
- Connect Directly to Audio-in on Amplifier
- SIP Endpoint on Network
- Can Configure up to 15 Paging Zones
- PoE Enabled
