

FEATURED SOLUTIONS

#1 Mobotix with ExuS Network Attached Storage

Mobotix provides a unique Hi Resolution decentralized solution with complete cameras that have no moving parts, low power consumption and operate from -22 to +140 degrees with no housings, heaters, or blowers required. Now there is also a Network Attached Storage unit that is purpose built for use with Mobotix. It uses only Server grade components and features automated camera setup including IP addresses, Names, and recording parameters. It also runs MxRemotePreview right on the NAS for fast and efficient remote review of data.

#2 TimeSight with Canon and Sentry 360

Timesight is both a powerful and flexible NVR for IP Surveillance and a long-term storage solution that is able to manage the Image quality over time reducing Resolution and FPS rate in a staged manner to reduce the amount of storage needed.

In our demo we will also show Timesight with Canons new PTZ cameras and with sentry360s super high resolution 10 Mega Pixel 360 Degree lenses.

Timesight can also be used as a long-term archiving solution for Mobotix MxCC based systems.

#3 The Brickcom BrickOne Solution

Brickcom produces a great middle of the line camera product and has some unique models for WiFi and 3G. Brickcom offers a free software based NVR for up to 16 cameras.

#4 Epygi with Mobotix T24 Doorstation , 2N Doorphone, GrandStream Video Phones

We will be featuring a complete Door Station solution combining two brands of door stations with a small solid state IP PBX solutions and Video Phones. The IP PBX can easily be extended to become a company wide phone system with IP Phones from select brands and SIP Trunks to lower communications cost.

#5 AVer Video Conferencing

We are proud to show AVer our new premier Video Conferencing solution.

AVer is the fastest growing mid market Video Conferencing system. The system is easy to deploy and connects with any SIP or H232 Video Conferencing system as well as with IP Video phones and SIP IP Cameras.

The AVer solution comes in a small kit containing a small Control unit for Codec, a HD camera and two AV quality echo canceling microphones.

#6 Multi Wan Router, Business Continuity and Bandwidth Management

Discover our state of the art Multi-WAN routers to not only give customers a redundant Internet but also lower cost by aggregating lower cost Internet providers. Draytek enables routing rules and bandwidth shaping along with multiple VLANs all on one router.

Draytek also supports 3G/4G dongles and our small fly 210 is frequently used for remote camera access. Last but not least Draytek's content management filter is very popular to protect companies from both time wasting and bandwidth wasting content as well as acts as a security filter for infections and attacks from malicious sites.

#7 Infrastructure and Peripherals Complete your Solution

Almost all IP products can be powered by PoE. ABP selected LG-Ericson POE switches for their consistent quality, generous power and processor for supporting a load of 24 Megapixel cameras. (High-end modules will be managed layer 3 switches). LG Switches are competitively priced and provide lifetime warranty.

We also offer Ethernet extenders with and without POE for different solution scenarios and different WiFi solutions. Including 24 & 48 port units.

Also don't get caught without a UPS, our Minuteman products feature a 3 year non prorated warranty and cost less than comparable APC units. We also have a wide variety of Ethernet extenders from various manufactures to fit your particular needs. Whatever your need, we can help you spec the right solution with these and other products like IR, Solar, Wireless, enclosures, etc.
