ABP has partnered with Kentix GmbH of Germany for two solutions: Access Control and Environmental Monitoring, a new subset of physical security mainly for critical assets, IT infrastructure, special areas or other high value assets that need environmental protection.

With the access of component Kentix Access Pad and Relay, building access control can be made IP to the door.

Kentix products are easily integrated in distributed IT infrastructure and can be scaled effortlessly. The Kentix environment ties into any network topology and offers its own highly secure and encrypted cloud monitoring platform. A unique feature is Kentix's extensive logging and notification system. Kentix is compatible with IPTechView™ / Mx-MSP™.

50% of IT outages have physical causes

In contrast to outages that are caused by software errors, downtime after a physical defect that has occurred is usually longer and more expensive.

Close your gap in your IT security and meet BSI safety requirements or ISO2700 with Kentix solutions.

Common threats are:

- Over temperature
- Power outage or UPS errors
- Fire or smoldering fire
- Water leakage
- Burglary and theft
- Human errors

Applications:

- Server Room
- IT infrastructure
- Office
- Industry

Kentix integrates with the following IT platforms:

IPTechView
The RMM Platform for MSPs in IP Technology

Nagios®

PRTG NETWORK MONITOR

(intel) DCM

ICINGA

IBM Tivoli. software

MOBOTIX

Kentix Access Systems, a Layered Solution

Kentix access control pairs with MOBOTIX surveillance cameras to provide an integrated solution without a server, licensing, head-end hardware, or on-going cost; which you can combine with Kentix environmental monitoring and straightforward intrusion detection to offer a multi-faceted system to your customer.

The Kentix concept to access control will be familiar to any existing MOBOTIX partner as they share the "decentralized" concept with smart hardware controlled by a web browser. The PoE connected access door controllers communicate with many other network based system to deliver a lightweight scalable tool into your catalog. Read more here

ABP provides FREE Partner Certification Training with EVERY Kentix NFR

☐ **Kentix Access Control NFR Package - $599**

IP Wall Reader with integrated PoE splitter and illuminated touch-pin-keypad

· 24VDC directly thorugh the reader module
· No additional cabling required for power supply
· Easy access management with LDAP and AD
· Easy assembly in outlet socket or surface housing
· Integrates IP video if required
· As a set with relay module or as extension reader
· 1-on-1 training webinar / Partner Certification @ completion
· Technical Support Package (2 hours)

☐ **Kentix Starter Kit Basic for NFR - $499**

· 1 pc AlarmManager-Basic with power supply (KAM-BASIC)
· 1 pc MultiSensor-RF (KMS-RF)
· 1 pc Modular-cable 10m
· 1 pc Patchcable 3m
· Application: IT-room up to 200sqft
· 1-on-1 training webinar / Partner Certification @ completion
· Technical Support Package (2 hours)

☐ **Combo NFR (above NFRs combined) - $1050**
